Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a substrate processing apparatus with (a processing chamber, a mounting table, a heating member in the mounting table and a sealing member disposed between the mounting table and the processing chamber) and a cooling unit.

Group II, claim(s) 6-10, drawn to a substrate processing apparatus with (a processing chamber, a mounting table, a heating member in the mounting table and a sealing member disposed between the mounting table and the processing chamber) and a (shielding member and a shielding cap).

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they have a lack of unity a posteriori because the common feature of (a processing chamber, a mounting table, a heating member in the mounting table and a sealing member disposed between the mounting table and the processing chamber) is known in the art. Ushigoe et al. (Patent Abstracts of Japan Publication number JP 05-009740, hereafter '740) teaches the combination of

a processing chamber (item 17 in Fig. 8 and [0004]) for accommodating a substrate (item 2 in Fig. 8 and [0004]) therein;

a mounting table (item 3 in Fig. 8 and [0004]) for mounting the substrate thereon;

Art Unit: 1709

a heating member (item 4 in Fig. 8 and [0004]) disposed in the mounting table, for heating the substrate;

a sealing member (item 12 in Fig. 8 and [0004]) disposed between the mounting table and the processing chamber.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prativadi B. Narayan whose telephone number is 571-270-1881. The examiner can normally be reached on MF 7:30 to 5 PM ET.
